the transcendental turn of husserl's phenomenology has challenged philosophers and scholars from the beginning this volume inquires into the profound meaning of this turn by contrasting its kantian and its phenomenological versions examining controversies surrounding subjectivity idealism aesthetics logic the foundation of sciences and practical philosophy the chapters provide a helpful guide for facing current debates

from the preface to the revised edition since its publication in 2007 transcendental phenomenological psychology has been sold on every continent except antarctica and is in the collections of research libraries in north america europe and asia even so its presentation to the academic community rightly provoked many comments corrections suggestions and criticisms such input while mostly welcome provided the impetus to publish a revised edition a phenomenological explanation of human consciousness has long been sought in regions of psychology since the discipline was first carved out of philosophical concepts and theories about the human condition in its earliest years western psychology was faced with two possible directions for this explanation an empirical naturalistic approach along with physics and biology or a non empirical eidetic approach

along with logic and mathematics edmund husserl took up the latter his phenomenological tradition of inquiry successfully spanned nearly forty years until suddenly stopped and largely suppressed during the second world war this book recovers husserl s revolutionary approach toward the human sciences just as it was developed and just as it is presented for further study here the author systematically gathers what husserl calls the leading clues in the phenomenological method proper for a psychology of affective inner experience and then for the first time applies husserl s own methodology for introducing a phenomenological psychology in the transcendental register of human consciousness unlike contemporary phenomenological psychology in the existential register transcendental phenomenological psychology is presented as an eidetic non empirical act psychology in husserl s mature genetic phenomenology this novel approach takes in the full range of solipsistic and transcendental subjectivity in husserl s theories of human consciousness and follows husserl s lead in presenting phenomenological psychology as an applied geometry of intentional experience within a step wise theory of inquiry this book is unique in human science today not only in its presentation of the development and applications of husserl s key concepts for the discipline of psychology but also for introducing a psychology that could be intuitively grasped as self evidently valid wherever one s interest might lie

diet is a major factor in health and disease controlled long term studies in humans are impractical and investigators have utilized long term epidemiological investigations to study the contributions of diet to the human condition such studies while valuable have often been limited by contradictory findings a limitation secondary to systematic errors in traditional self reported dietary assessment tools that limit the percentage of variances in diseases explained by diet new approaches are available to help overcome these limitations and advances in the assessment of dietary intake is focused on these advances in an effort to provide more accurate dietary data to understand human health chapters cover the benefits and limitations of traditional self report tools strategies for improving the validity of dietary recall and food recording methods objective methods to assess food and nutrient intake assessment of timing and meal patterns using glucose sensors and physical activity patterns using validated accelerometers advances in the assessment of dietary intake describes new avenues to investigate the role of diet in human health and serves as the most up to date reference and teaching tool for these methods that will improve the accuracy of dietary assessment and lay the ground work for future studies
