concludes that educational tests can be misleading or worse when used for purposes other than which they were originally designed charts and tables

education is a profession in which billions of federal dollars have been spent to reduce academic underachievement particularly for minority children from poverty homes few funded programs have reduced failure on standardized achievement tests despite either repetition or innovation most children who fail do not perform substantially better the next time

around on the other hand practitioners who have used the dunn and dunn learning styles approaches have reported statistically higher standardized achievement test scores among average poorly achieving and special education students this book is based on the practical diverse experiences of more than thirty different supervisors throughout the united states representing a variety of urban and suburban locations with diverse student populations each supervisor was able to obtain significantly higher standardized achievement test scores for his or her student populations

although originally designed as instruments to gauge students progress tests eventually were used to modify curricula learning materials pedagogy and many practical features of schooling tests were employed to shape attitudes toward national issues such as employment immigration and defense worried about the enormous consequences that were at stake advocates and opponents pitched their cases to educators parents journalists and policymakers and also targeted special audiences testing proponents pleaded with military leaders businesspeople and scholastic publishers while their adversaries appealed to job seekers college applicants racial minorities and anti establishmentarians this book illustrates how all of these parties showed interest many became passionate and some decisively influenced the course of american educational testing
